

Flush Pull Handles

Flush pull handles are recessed handles that sit flush with the surface of doors, drawers, or sliding panels, providing a sleek, minimalist appearance. They are commonly used in contemporary and modern designs to maintain a clean and streamlined look. They can be rectangular, circular, or oval.

FAQs

Q: Where are they used?

A: Flush pulls are commonly used for sliding or pocket doors. They can also be used on wardrobe doors, built-ins and media cabinets.

Q: How are they installed?

A: They usually require routing or cutting into the face of the cabinet to recess the pull.
