ABOUT US.

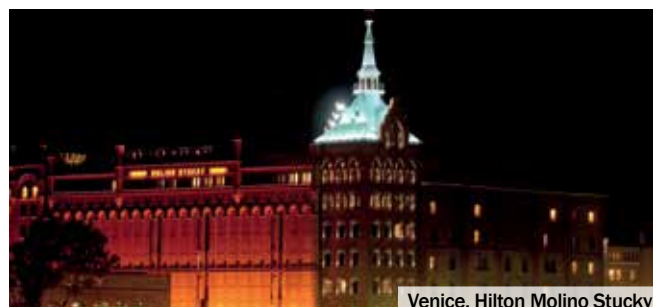

M.MARCUS LTD AND ISEO SECURITY PRODUCTSA LONG STANDING PARTNERSHIP

In 1969 ISEO security products was founded from Giuseppe Fachinetti's extraordinary entrepreneurial spirit. It began manufacturing locks, cylinders and padlocks in Pisogne, a village on Lake Iseo in Northern Italy, from which the company gets its name. Deeply rooted in its origins, ISEO has remained faithful to its roots and to the family values of the founders who still, today, remain in control of the business strategy for the much larger group. The core values of their business being SECURITY, RESPECT, RESEARCH, QUALITY and RELIABILITY ISEO has grown into today's multinational business with offices, warehousing and distribution in many different countries throughout the world.

More than two decades have passed since ISEO searched the U.K. to find a suitable and like minded company with the same values in order to be principal distributor and bring their product and brand to the British market. This company was M.Marcus Ltd, a similar family owned business with long established links throughout the architectural ironmongery market. A company still renowned for its proud family history since the 1940's with their Heritage Brass door furniture range.

An ideal partnership was formed and shortly after this the first Iseo branded products began appearing in the market through the support of customers who recognised a quality product.

In recent years ISEO and M.Marcus have worked together to find products that continue to give the best in SECURITY, QUALITY and RELIABILITY.

ISEO RECENT PROJECTS

Vatican, Pontificia Università Lateranense. To limit the huge number of keys to access all rooms inside its University and Library, ISEO offered just one key ensuring access to all rooms as well as control over any unauthorized access. The electronic cylinder ensures higher security and flexibility since it can be completely programmed and disabled.

Paris, new Industrial and Technological Centre, La Defense. Installation of CSF Mechatronic System, the best ISEO solution to manage access control and security feature all in one.

Venice, Hilton Molino Stucky. Completely restructured in 1994, it became an 5-star hotel in 2007. The restructuring works highlighted the need to have a universal key for the Security Manager as well as special keys for the staff. ISEO supplied master keyed mechanical cylinders.

ABOUT **YOU**. WHICH CYLINDER MEETS YOUR NEEDS BEST?

PRIVATE HOUSES

Do you live in a single house or in a multi-family residential building?

SINGLE HOUSE

Do you have a Property Card for the door cylinder of your main entrance?

Does your front door have an additional lock?

Do you need to give the keys to child minder, house cleaners, or other people?

Do you need to secure your main entrance, gates and garage doors too?

MULTI-FAMILY RESIDENTIAL BUILDING

How many private accesses do you need to manage?

Do you have a Property Card for the door cylinder of your apartment main entrance?

How many common accesses need to be managed (gate, pedestrian entrance, front main door)?

Do you need to give the keys to other people?

PUBLIC BUILDING, COMMERCIAL PREMISES.

Are you managing an administrative building? Do you need to supervise hospitals or public institutions?

How is your building used?

What is your organizational structure like?

How strict are your security requirements?

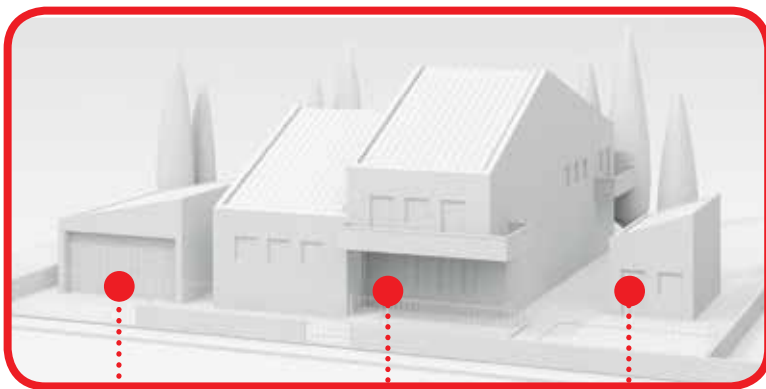

Do you need to use a different key for every door?

Are there important documents, which need to be securely stored in rooms with controlled access?

Do you need to comply with specific insurance standards?

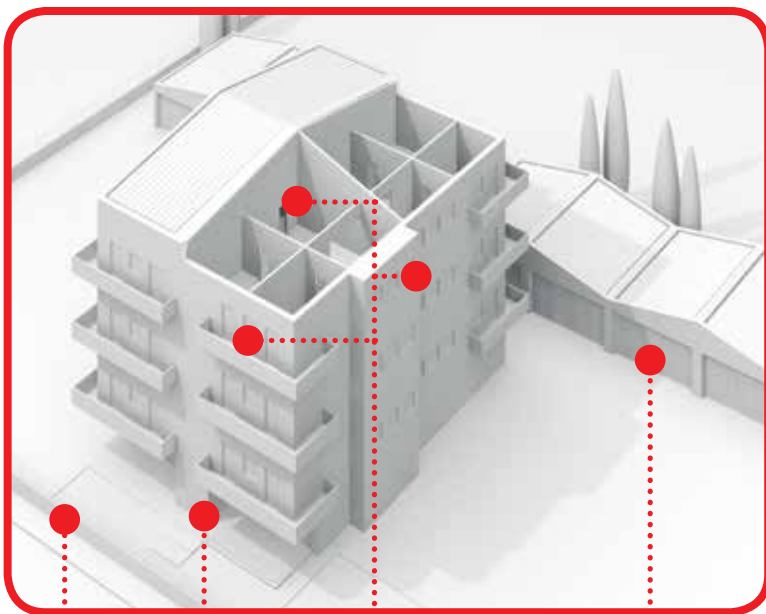

Are there authorized people entering the site outside normal working hours?

M.Marcus Ltd., offers comprehensive services, from preliminary analysis to detailed planning of the locking systems, to realize a tailor-made solution for all your security needs

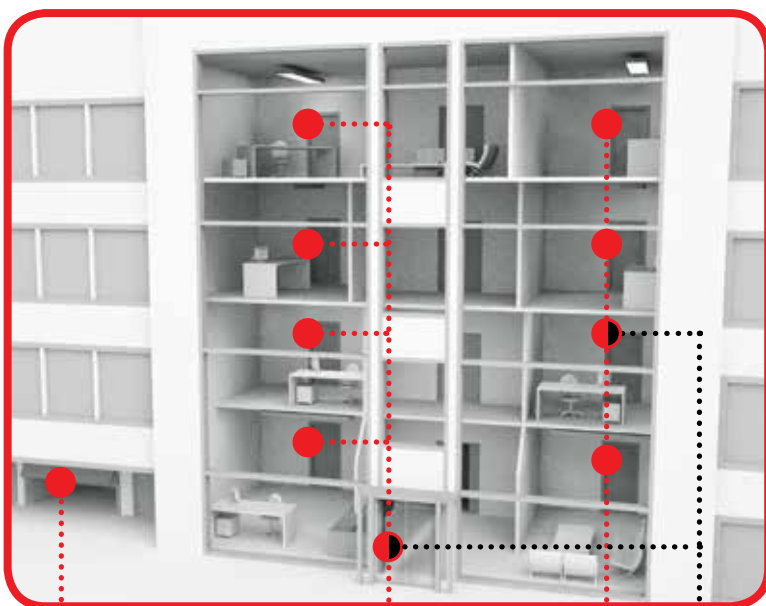

DO YOU LIVE IN A SINGLE HOUSE?

Using one unique key, you can open all accesses of your house, having on each door the right cylinder according to specific security needs.

DO YOU LIVE IN A MULTI APARTMENT HOUSE?

Using the same key, you can open the common entrances like main front door and gate, and your private doors, like apartment entrance door, garage and cellar. Each homeowner cannot open other exclusive doors. Cylinders installed in private entrance doors and main front door may be of different security levels, based on the single needs of the specific room. For private entry door, we suggest to install high security cylinder.

DO YOU NEED TO PROTECT A COMMERCIAL PREMISES OR PUBLIC BUILDING?

When managing public buildings (businesses, hospitals, schools, administrative offices, etc.), other factors gain primary importance such as access to emergency openings, protection against unauthorized copying of keys, permissions management. At the same time, many people must be enabled to share access without sacrificing security. Flexibility of ISEO products perfectly meets these requirements as hierarchical levels of access can be easily managed. For example, in a company the Production Manager will have access to all the doors of his department and the warehouse but will not have access to the offices of the Commercial Department, Financial Office and to the Chief Executive Office.

HOW TO CHOOSE THE **RIGHT** CYLINDER

Security of your home and personal belongings depends on a cylinder assuring good resistance against brutal attacks:

RESISTANCE AGAINST DRILLING

RESISTANCE AGAINST PULLING

RESISTANCE AGAINST MANIPULATION

RESISTANCE AGAINST BREAKING SACRIFICIAL BREAK SLOT

In addition, to increase door protection against forced entries, it is worthwhile to install a protective security rose and/or lever on plate handle. This represents an effective barrier between the lock and the outside.

Security of your home means having a protected key which avoids undesired duplicates.

Some ISEO products can help protect in two ways: -

ONE UNIQUE KEY, HAVING A PROTECTED, TECHNICALLY PATENTED SOLUTION

**THE CORRESPONDING PROPERTY CARD, WHICH HAS TO BE PRESENTED AT SPECIALIZED DEALERS' WHEN ASKING FOR A DUPLICATE.
THE PROPERTY CARD AIMS TO IDENTIFY THE GENUINE KEY HOLDER.**

FLAT VERTICAL KEY TYPE 'F'

F5

Page 10-13

If you need a cylinder performing essential security, F5 is the right choice. F5 is the basic level cylinder for your access requirements.

EN1303
tested

F6

Extra
Page 14-15

Do you need a basic level of security with good master keying capability? F6 Extra is the right cylinder to manage doors which do not need high security defence but which will protect against certain external attacks thanks to additional features within the cylinder itself. Carries British Standard Kite mark certification TS007 1 Star and Secured by Design accreditation.

EN1303
tested

F6

Extra S
Page 16-17

Do you need a basic level of security with good master keying capability? F6 ExtraS is the right cylinder to manage doors which do not need high security defence but which will protect against certain external attacks thanks to additional features within the cylinder itself. Carries British Standard Kite mark certification TS007 1 Star and Secured by Design accreditation. Equipped with Sacrificial Cut and Metal Strengthening Bar for additional defence and resistance against snapping.

EN1303
tested

REVERSABLE KEY TYPE 'R'

R6

Page 18-20

Do you need a simple, reliable product to make secondary accesses in shops, homes, and buildings secure? R6 with its reversible key profile will protect you against certain external attacks thanks to additional features within the cylinder itself.

EN1303
tested

R11

Page 21-23

R11 cylinders protects against unwelcome visitors. Featuring a reversible key system and additional internal features within the cylinder itself, this 11 pin system also offers enhanced master keying capability for larger commercial schemes.

EN1303
tested

R50

Page 24-26

Do you need a high security product to make principal residential accesses secure or manage medium/big sized commercial buildings and shops? Having max grade of Attack Resistance, R50 will protect you against manipulation and break-in attempts. R50 obtained BSI certification stating its resistance against bumping and picking methods. Patented protection against copies increases security and guarantees legal defence against unauthorized duplication. (Exp. Dec 2020)

- *Most cylinder types available in colour finishes.
- *Please enquire for details.
- When ordering use code **IS-SERVCOL** there is an addition to the regular product code retail price. (This excludes the other additional MK/KA charge)
- Lead time for colour finishes 4 weeks from the date of ordering, stating finish required.
- Please be aware that colours shown here are representative only, and M.Marcus Ltd., do not guarantee colour matches as finishes are designed to be 'scheme complimentary' in nature.

What is Master Keying?

- A master key system enables the owner/manager of a building (or group of buildings) to control the access rights of inhabitants and visitors to their property.
- Master key systems include the option of a master key which may allow access to every part of the property, while individuals may be issued with a key which allows them access to their own room/area, and shared areas of the building.
- Any building or group of buildings can be master keyed, from a basic system such as having a home secured all on one key, to the more complex systems where several buildings are secured on one master key, with each individual room also operating on an individual key.
- Master key systems are produced by software using mathematical algorithms to generate a set of cylinder pinning and key cutting information. The software calculates the system based on the data entered by your M. Marcus technical advisor in relation to the design of the suite. This is why it is so important that we get ALL of the relevant information about the suite before it is designed.
- Master Key systems are now calculated and generated within our Security Service centre in Dudley

Factors to be Considered

Master key systems are designed using mathematical algorithms, and no two sets of pinning will be the same. Therefore it may be possible to get the maximum 60000 differs from one suite, but only 50000 differs from another. This is because all suites are generated in the first instance from a master key biting combination. Some biting combinations will allow for more differs than others due to the number of odd/even cuts and the size of the steps between cuts.

Your first order for a master key suite may only call for a small number of cylinders, but as the building becomes extended or the room designations change, you may need to add more cylinders, or include the use of a common entrance. You may even need to add another building to operate under the same master key. We would need to know these future plans (to the best of your knowledge) at the point of suite design, otherwise such extensions may not be possible.

The addition of subs and common entrances on your master key suite will decrease the maximum number of differs possible on the suite. Your Territory Manager or technical advisor at M. Marcus will be able to talk through the options with you on larger, more complex suites.*

* Common entrance cylinders contain more master wafers than a standard differ cylinder. They are also used more frequently in most instances. The increase in moving parts in each pin chamber, along with the additional use can result in common entrance cylinders needing to be maintained/replaced more frequently than a standard differ cylinder.

Important Information & key product facts

- We recommend that in order to maintain the smooth operation of your cylinder lock you lubricate from time to time using the following product (ISEO cylinders only): Interflon Finlube TF. There is no specific timed requirement for lubricating cylinders as atmospheric differences can vary from site to site. However, we recommend this particular lubricant be used should you feel that the cylinder operation is becoming less smooth.
- Master Keyed and Keyed Alike product lead time is generally 3-5 working days from the date of receipt of official purchase order.
- Additional keys/cylinders for previously manufactured systems will only be made upon receipt of a completed official letter of authority form, provided by M.Marcus Ltd, upon request. Where end users require alternative supply routes other than the originator.
- Although M.Marcus Ltd maintain a thorough and concise record of previous Master Key suites ordered for a maximum period of ten years from original date, we do not give a guarantee that suite extensions or additional cylinders/keys can be supplied after the original suite has been written.

Ordering your Cylinders

To order your cylinder please insert prefix code. For example:

IS8209

followed by the size: **C** / **D**
35 35

and then the finish: 9 = Nickel
7 = Brass

Resulting in an order code - for the **F5** Double Differ Cylinder 70mm in Nickel finish in this example:

IS8209-3535 9

If you require a Masterkeyed version or Keyed Alike version: Please use the suffix **MK** or **KA**

Using the example code above that would give:

IS8209-3535 9 MK (Masterkeyed)

IS8209-3535 9 KA (Keyed Alike)

PANIC EXIT DEVICES

NO PANIC, NO BACTERIA, NO ADDITIONAL COST.

Anti
GERM

AntiGerm is an absolutely safe permanent antibacterial treatment which ISEO has decided to use on its range of Panic Exit Devices.

It is based on the slow and constant release of silver ions which penetrate the microbial organism and prevent its reproduction by attacking its DNA and finally inhibiting cellular respiration.

4.1 MILLION INFECTIONS IN EUROPEAN HOSPITALS

Infections in hospitals are often underestimated both from a medical and cultural point of view. Every year in Europe 4.1 million patients acquire an infection in hospitals.*

* Source: Sanità in Cifre, 23/02/2012

650+ BACTERIAL SPECIES

In a few minutes AntiGerm kills more than 650 viruses, molds, alga, mycosis and bacteria species (such as Legionella, Salmonella and MRSA) thanks to a continuous action 24 hours a day, 7 days a week
reducing bacteria levels by 99%

ANTIGERM CERTIFICATION

INDEX TO RANGES

presented by

m.marcus
est. 1940

ISEO has an ability to integrate Italian high design and technical innovation into a range of emergency exit devices that are setting new standards in both design and performance.

ISEO offers, without compromise, a wide range of emergency exit hardware devices together with a choice of superior finishes to compliment the appearance of any project.

ISEO emergency exit devices endure rigorous testing to achieve the performance and fire resistance requirements of either BS EN1125 or BS EN 179 emergency exit devices as applicable.

ISEO emergency exit devices can be installed to most door material types by adding the relevant additional components found within the accessories section of this catalogue.

OUR STANDARDS.

THE NEW 2008 EN179:2008 STANDARDS FOR PANIC EXIT & EMERGENCY DEVICES

The new standards do not oblige ISEO to introduce any further changes to its products, as they are already designed in total compliance with the new regulations which have been effective since January 1, 2009.

Dealers will be allowed to sell the products marked according to the old standards until stock exhaustion, without time limits.

ISEO dealers know they are selling products which fully complied with the standards before January 1, 2009, and for which only the mark has been changed.

The new certificates also show compliance of products with the previous mark.

Our products have also obtained the ICIM "P" voluntary certification which provides for further external testing to assert product quality.

Warning

The field of application of these panic exit devices is limited to the following:

Maximum door mass	Maximum door height	Maximum door width	Temperature interval
200 Kg	2520 mm	1320 mm	-10°C+60°C

The limits indicated above are identified by EN1125 standard. ISEO Serrature declares that the performances of the devices and their accessories are in compliance with the requirements of the standard, for doors with mass max. 200 kg, height max. 3400 mm and width max. 1500 mm.

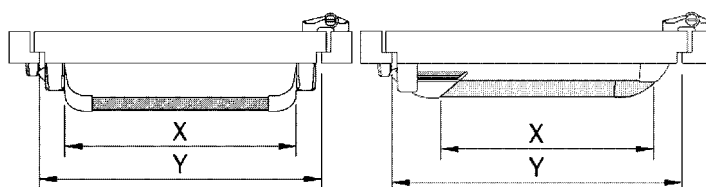

Fig. 1

Fig. 1

The effective length (dimension X) of the bar shall be as near as possible to the effective width (dimension Y) of the door for which the device is intended, but never less than 60% (Fig.1)

The door leaves and frames must be made of a material with sufficient rigidity to ensure that any distortions that occur during use can not exceed 5 mm in any position. The device must be fitted to the door leaf using materials that guarantee a tensile strength for each screw of >1,5KN.

Products certifications

Iseo Serrature has been awarded by Warrington Certification Limited (WCL) the certificate of conformity with EN 1125:08 standard allowing to apply the CE mark on panic exit devices, compulsory from 01/04/2003.

ISEO panic exit devices have already obtained the Voluntary Product Certification by an independent organisation, ICIM, as provided for in EN 1125:08.

The ICIM voluntary certification establishes stricter requirements than the CE mark.

All the updated certificates can be downloaded from our web site: www.m-marcus.com

How to read the marking **EN 1125:2008**

Not suitable for fire/smoke doors	3	7	6	0	1	4	2	2	A	A
Suitable for fire/smoke doors	3	7	6	B	1	4	2	2	A	A
	Category of use	Durability	Test door mass	Suitability for use on fire/smoke resistant doors	Safety	Corrosion resistance	Security	Projection of device	Type of bar operation	Field of application
	1	2	3	4	5	6	7	8	9	10

Category of use.

There is only one category which refers to a high frequency of use where there is little incentive to exercise care, i. e. where there is a chance of an accident and misuse.

Durability.

There are two grades of durability.
grade 6 = 100,000 operations
grade 7 = 200,000 operations

Test door mass.

There are three door mass categories:
grade 5 = up to 100 kg
grade 6 = up to 200 kg
grade 7 = over 200 kg

Suitability for use on fire/smoke resistant doors.

Three fire/smoke resistance categories:

grade 0 = not suitable for fire/smoke resistant doors
grade A = suitable for smoke resistant doors
grade B = suitable for fire/smoke resistant doors

Safety.

There is only one category representing the maximum grade, since panic exit devices must ensure people's safety.

Corrosion resistance.

There are two categories as per prEN1670:

grade 3 = 96 h (high resistance)
grade 4 = 240 h (very high resistance)

Security.

Only one grade of security shall be used: the security requirements are secondary to those of safety.

Projection of device.

There are two categories:
grade 1 = bar projection up to mm 150 (large projection)
grade 2 = bar projection up to mm 100 (standard projection)

Type of bar operation.

There are two types of operations:
A = panic exit device with "push-bar" operation
B = panic exit device with "touch-bar" operation (Push-Bar)

Field of application.

There are three categories:
A = single door, double door: active or inactive leaf
B = single door only
C = double door, inactive leaf only

For further information please refer to
EN1125:97+ A1:2001 standard.

Push Pad Bolt Emergency Exit Device

Ref: **IS947-2020704**

Finish: **Grey**

- For use on single doors
- Suitable for most door types in accordance with EN179:2008
- Rods and Covers to a maximum door height of 2400mm
- Operated by means of push pad
- Non-rebated double doors

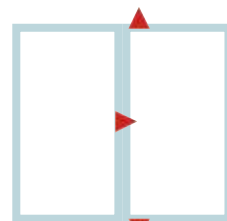

Standard

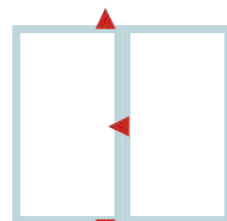

EN 179:2008

Emergency exit devices in compliance with standard EN 179 are conceived to be used where there is a very low probability for panic situations to happen, people are aware of the use of the emergency exit device and qualified for it. The aim of the standard requirements is mainly to ensure a reliable and safe evacuation through a door making use of the minimum effort, even though a prior knowledge of the door device might be necessary.

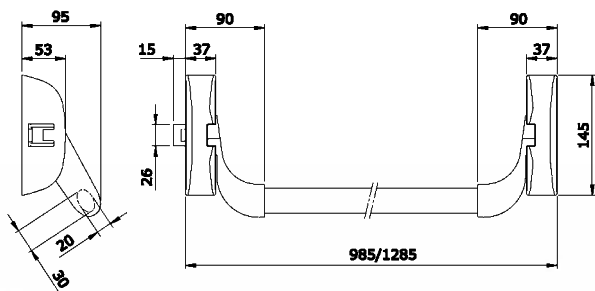

LATERAL/VERTICAL FIXING

LATERAL/VERTICAL FIXING

Finish: **Grey**

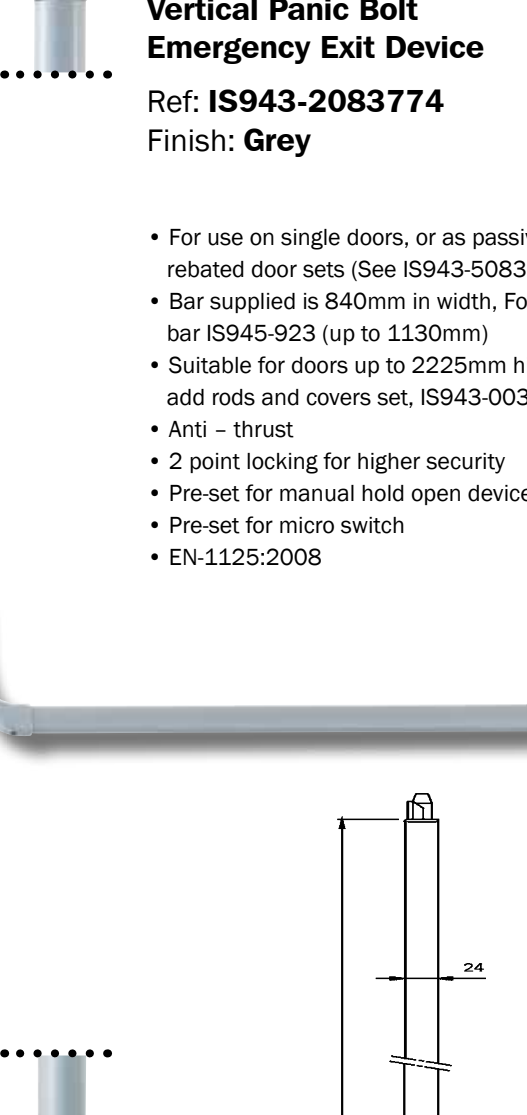

- For use on single doors, or as active leaf on double rebated door sets (See IS943-5083335 right)

Ref: **IS940-13005 - BLACK**

- Can be used with any 40mm euro single cylinder
- Fixed lever design
- Requires key after every action

Escape routes represent a guarantee for people's safety in case of fire or emergency. Yet, they are always critical points for the security of the buildings and the goods they contain. If not adequately monitored, they become the ideal way for intruders to walk in and out. Push Sirena by ISEO offers the solution to these problems.

No need for complex and expensive alarm systems on your door. Push Sirena is installed as a traditional panic exit device but has an acoustic alarm: when it is activated, it immediately detects any unauthorized opening of the escape route door. Therefore, it represents the ideal solution for shops, small warehouses and all places where escape routes need constant monitoring.

Through a selector operated by a key half-cylinder the user can program the functions and choose the device status, namely: ON, OFF and BREAK (courtesy function allowing exit without triggering the alarm). If the bar is pressed and the alarm is ON, the powerful siren emits a strong acoustic signal (90dB). The device LEDs show the current status as well as the battery status.

To order Push Sirena use the following order codes:

Sirena Attachment Grey : IS942-00093

Sirena Attachment Black : IS942-00095

Please note that ISEO Touch Bar is ordered separately

Device Status (Key operated)

- **OFF:**
the bar can be pressed without triggering the alarm.
- **ON:**
the alarm, both acoustic and visual, comes into operation when the bar is pressed.
- **Break or courtesy function:**
a temporary status (5 sec.) within the ON status allowing exit without triggering the alarm.
- **Ongoing alarm:**
when the alarm is ON and the bar is pressed, the device emits a strong acoustic signal and a red LED flashes.

PUSH SIRENA

ALARMED PERMANENT SECURITY FOR PUBLIC SPACES

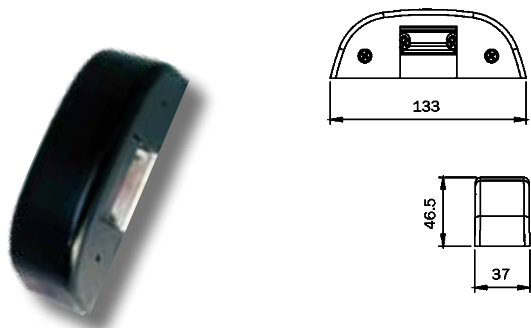

- Courtesy function allowing exit without alarm.
- Alarm reset by key only.
- Acoustic and LED signals showing the device and battery status.
- Powered by 2 AA alkaline batteries (over 2 years of life without alarms).
- 3-level battery charge indicator allowing scheduled replacement.
- Selector compatible with European half-cylinders (size 30+10 with 8-position DIN cam).

PANIC HARDWARE ACCESSORIES
