Electrical Plate Finishes

Heritage Brass offers its electrical accessories in a variety of quality finishes. The illustrations shown throughout this brochure provide a good representation of these finishes subject to the constraints of the colour printing process. Viewing the different finishes in differing types of light may however cause subtle perceived differences in tone. Whilst much care is taken in maintaining the consistency of our antique finishes, colour tones and surface patterning may vary slightly due to the individual plate finishing processes involved.

Box Depth

When installing electrical accessories it is important to ensure that wall boxes of adequate depth are used. The box depth should comfortably accommodate the accessory and its connecting cables, and is particularly important with flat plate ranges and power accessories. The product selector tables in this catalogue give recommended box depths for normal installation conditions.

Trailing Edge Dimmers

Maximum of 10 LED lamps per module.

Minimum load 0 W per module. Maximum load 120 W per module.

Suitable for most quality dimmable LED lamps. Compatibility is not guaranteed with all LED lamps.
