**Heritage Brass**  
SOLID BRASS DOOR FURNITURE

## *Matt Bronze Finish*

An aged finish on brass creating a vintage appearance, yet one that also looks outstanding in contemporary schemes. Over a period of time the bronze colour will lighten along any edges and surfaces that are frequently touched and create a naturally aged appearance highlighting frequently touched areas and exposing the brass below.

## *Antique Brass Finish*

With russet hues and a brass undertone this variation on brass retains a warm and mellow character but adds age and maturity by highlighting the variance of shades making each piece both alluring and unique.

## *Satin Nickel Finish*

With its honeyed grey tone created by brushed nickel plating on brass, this finish closely matches Stainless Steel but offers a warm and subtle alternative which is popular in traditional and modern décors.

## *Polished Nickel Finish*

With its subtle golden hue this is a mellow alternative to polished chrome. The finish is not coated and will oxidise naturally. If not regularly buffed with a soft cloth this finish will subtly change over time by taking on an aged patina.

## *Polished Brass Finish*

Warm, mellow with a sense of heritage and comfort this highly polished finish is opulent without being flamboyant. Polished Brass coordinates perfectly with traditional décor.

## *Satin Brass Finish*

A modern alternative finish to traditional polished brass this attractive brushed texture beautifully mellows the colour of solid brass and adds warmth to both a traditional and a soft contemporary décor.

## *Polished Chrome Finish*

A bold classic contemporary finish on Solid Brass. The mirror effect reflects light and colours of the surroundings and will complement perfectly any fashionable colour scheming. Polished Chrome is easy to clean and is low maintenance.

## *Satin Chrome Finish*

The brush marks of satin chrome will appeal to those who favour an industrial yet contemporary chrome finish.  
Satin Chrome Finish is also less prone to finger marks than polished chrome.

## *Combination Finishes*

Apollo [AP] combines Polished Chrome and Satin Chrome  
Jupiter [JP] combines Gold Plate with Satin Nickel  
Mayfair [MF] combines Polished Brass with Satin Brass  
Mercury [MC] combines Polished Nickel with Satin Nickel  
Chrome/Brass Finish [CB] combines Polished Chrome with Polished Brass

These blends of two finishes will appeal to those who like contrast and distinction.

## *Solid Bronze Rustic*

These striking products are made using molten Bronze flowing into cavities within a sand mould. This casting process leaves light surface indentations to bestow a rustic appearance, which contrasts in texture to other smoothly finished products. A light bronze patina is applied by hand on the cast bronze creating a country-style appearance. Over a period of time the bronze colour will lighten along any edges and surfaces that are frequently touched creating a naturally aged appearance as the bronze below is slowly exposed. When untouched, the finish may darken as the bronze oxidises. As this is a living finish, products will not be identical, there will be slight variation in hue and tone.

<b>YKCSLE39.CE</b>	3" SSS

### REBATE KITS TO SUIT

<b>YKRB BSSL7.5</b>	1/2" Brass Finish
<b>YKRB BSSL9.5</b>	1/2" Satin Finish
<b>YKRB BSSL7.1</b>	1" Brass Finish
<b>YKRB BSSL9.1</b>	1" Satin Finish

### Description

- For external doors which require to be latched and securely locked using a Euro Profile cylinder.
- Suitable for use with Euro Profile door handles with 8mm spindles and 48mm centres (CTC).
- Suitable for Lever on rose handles requiring bolt through fixing or with door knobs.
- An Iso Euro Profile cylinder or similar will be required to operate the bolt.
- Includes fixing guide template & dustbox for strike.
- Easily reversed for door handing without opening lock by turning latch bolt

2 1/2" recommended for Levers  
3" recommended for Mortice Knobs

<b>NL-R3060-WH</b>	60mm White Finish

### REPLACEMENT RIM CYLINDERS

<b>NLCYL PB</b>	Polished Bass Finish
<b>NLCYL PC</b>	Polished Chrome Finish

## AGED FINISHES

We have added 5 new finishes to our already extensive product range.

### **MATT Bronze**

Polished Brass which is not lacquered will naturally darken with time, however with our MATT Bronze finish we have aged the brass, and applied a clear lacquer.

Over a period of time the bronze colour will lighten along any edges and surfaces that are frequently touched and create a naturally aged appearance highlighting frequently touched areas and exposing the brass below.

As the finish will change over time, there is no warranty on this finish.

### **Antique Brass**

With this finish we polish the brass and apply a bronze patina over the total surface.

Using soft brushes our experienced polishers remove some of the bronze patina to expose the brass below thus highlighting the variance of shades making each piece both appealing and unique.

To preserve the final appearance, we apply a protective coating of clear electrophoretic lacquer.

### **Polished Nickel, a Living Finish**

Our Polished Nickel finish is nickel plating on highly polished brass.

The nickel finish is not coated and will therefore oxidise naturally.

If not regularly buffed with a soft cloth the nickel plate will subtly change over time by taking on an aged patina.

### **Solid Bronze Rustic, a Living Finish**

These striking products are made using molten Bronze flowing into cavities within a sand mould. This casting process leaves light surface indentations to bestow a rustic appearance, which contrasts in texture to other smoothly finished products. A light bronze patina is applied by hand on the cast bronze creating a country-style appearance.

When leaving the factory these products are coated with paste wax. This acts as a barrier to prevent oxygen from immediately oxidizing the bronze surface. Over time, this layer is worn away allowing water and oxygen to then oxidise the surface.

Over a period of time the bronze patina will lighten along any edges and surfaces that are frequently touched, creating a naturally aged appearance as the bronze below is exposed. When untouched the finish may darken as the bronze oxidises.

As this is a living finish, products will not be identical, there will be slight variation in hue and tone.

Avoid exposure to abrasives or chemicals as these will mar the surface finish.

It is good practice to occasionally wax the surface using Carnauba wax.

As the finish will change over time, there is no warranty on this finish.

### **Black Iron Rustic**

Our Black Rustic range is produced with molten iron flowing into cavities in a sand mould and made malleable by a process known as annealing. The surface of this product will reveal slight indentations created as the metal cools while the shape is being formed to bestow an aged look.

After casting we treat the iron with a process called Phosphating, which slows the rusting process, and coat the product with a powder coated black finish.

Any Iron product is prone to rusting, please read our maintenance recommendations.

## PRODUCT CARE

Maintaining the quality of the finish requires occasional care by removing dust and stains from the surfaces.

### **Lacquered Finishes**

Comprising Polished Brass, Satin Nickel, Antique Brass, Matt Bronze, Satin Brass, Jupiter, Mercury and Mayfair.

All lacquered finishes will eventually break down over time. Lacquer breakdown will occur more frequently on products exposed to the climate, particularly in coastal areas and in polluted environments.

Regularly removing dirt and watermarks with a non-abrasive cloth will help maintain the life of this finish.

For products used externally applying a non-abrasive light wax coating will protect the lacquer and could extend its life. DO NOT USE metal cleaners or aerosol sprays as these will damage the lacquer.

External fittings will also benefit from a periodic light oiling of springs and moving parts

The life of the lacquer is beyond the manufacturer's control, and therefore cannot be guaranteed.

### **Polished Chrome, Satin Chrome, Apollo and PVD Finishes**

Regularly removing dirt and watermarks with a nonabrasive cloth will help maintain the life of these finishes.

External fittings will also benefit from a periodic light oiling of springs and moving parts

### **Black Iron Door Furniture**

Regularly removing dirt and watermarks with a non-abrasive cloth will help maintain the life of this finish.

Exposure to humidity will cause the product to rust so all external fittings will benefit from an occasional wiping over with a lightly oiled cloth and a periodic light oiling of springs and moving parts.

If the decorative material shows signs of 'Chipping' remove any flaking or loose paint, making sure the surface is dry and grease free, then spot the affected area with enamel paint e.g. 'Humbrol' or similar.

## FREQUENTLY ASKED QUESTIONS

### Year of Establishment

We were established in April 1940.

### M. Marcus and Heritage Brass

M. Marcus started selling products under the brand name of Heritage Brass in the 1980's so we are now also known as Heritage Brass.

### Quality of Brass

All our Heritage Brass door furniture is created using hot forged brass which ensures the best manufacturing process for both strength and superior finish.

### Durability of Springs

The springs used are crucial to prevent breakages so we source our door furniture springs from a long established Italian manufacturer. Our springs have been cycle tested to provide 100,000 lever operations, and for residential use we offer a 10 year mechanism warranty.

### Locks and Latches

Our handles are not supplied with locks, latches or escutcheons. These items need to be purchased separately for the specific function required. Our lock ranges are shown on pages 105-107.

### Door Thickness

The spindles we supply as standard with our door furniture will in most cases be suitable for common domestic door thicknesses in the range of 35 to 44mm without having to be cut down. However as door thicknesses may be greater we can supply to special order longer spindles for doors of 50mm and upwards.

### Fixing of Round Rose Door Furniture

On levers where both woodscrews and bolts are supplied, we highly recommend that the bolts are used to securely clamp the handles to the door and not the woodscrews, as with just the woodscrews the handles will not be secured sufficiently on the door. The woodscrews are only to be used as an additional means to limit any tendency of the inner roses to rotate once fitted.

We reserve the right to amend products & sizes without notice and all dimensions provided are approximate. Colours shown in this catalogue may vary slightly from actual product due to photographic and colour reproduction. All errors and omissions excepted. Antique and Bronze finishes have variations in tone and colour, this is not a fault but a characteristic of the finish, so finish matches cannot be guaranteed.

## Accreditations

M. Marcus Ltd. is an:  
ISO 9001:2015 & ISO 14001:2015 accredited company.

Certificate No. FM 35735

## WARRANTIES

### Warranties for Door Hardware

These warranties are offered in addition to any statutory legal rights for the sale of goods.

M. Marcus will not be liable for any incidental or consequential damages arising from the sale or use of our products. We assume no liability for any labour charges regarding the removal or reinstallation of the products; nor will we cover any carriage costs. Our only obligation will be to replace any defective products.

For terms and conditions of sale please refer to our current retail price list.

### 10 Year Mechanism Warranty

Sprung sets will be replaced if within 10 years from the date of purchase the spring mechanism breaks due to faulty workmanship or materials. The warranty is made void by any breakage which in the manufacturer's opinion arises from misuse or lack of maintenance. To validate any claim under this warranty a receipt or other proof of the age of the installation may be requested.

### Everbrite: 10 Year Finish Warranty

Our 'Everbrite' branded products will be replaced if within 10 years from the date of purchase the decorative finish discolours due to faulty workmanship or materials. This warranty applies only to the original purchaser. The warranty is made void for any discolouration which in the manufacturer's opinion arises from misuse or lack of maintenance. To validate any claim under this warranty a receipt or other proof of the age of the installation may be requested.

### Warrington Fire Assessment Report

FD30/60

To BS 476 : Part 22 : 1987  
or BS EN 1634-1 : 2000

M. Marcus brass lever furniture has been assessed for use on 30 and 60 minute timber based fire doors when fitted in conjunction with a fire tested latch or lock. (Excludes Low Profile ranges).

This assessment considers the fire resistance performance of single- acting timber based door sets, when fitted with M. Marcus handle furniture. Should the recommendations given in the report be followed the report concludes that previously fire tested (or assessed by warringtonfire) timber door sets which have achieved 30 or 60 minutes integrity in accordance with BS 476 : Part 22 : 1987 or BS EN 1634-1: 2000 as discussed in the report may be fitted with M. Marcus handle furniture as detailed in Annex A, without detracting from the overall integrity performance (and insulation where relevant) of the door set.

### Warranties for Electrical Accessories

These warranties are offered in addition to any statutory legal rights for the sale of goods.

Heritage Brass Electrical Accessories are guaranteed for 5 years (dimmer switches 1 year) provided the following conditions are met.

- 1) The accessory has been properly installed complete with its protective gasket by a qualified electrician in accordance with the wiring regulations current at the time of installation.
- 2) The accessory has been subjected to normal use and has not been altered or dismantled in any way.
