Presents

ISEO® Zero1

ELECTRONIC ACCESS SOLUTIONS

2021

Edition FIVE

ISEO® Zero1

ELECTRONIC SOLUTIONS

A new range of electronic products by ISEO Group which totally changes the way to manage security and access control systems

Presented by:

m.marcus
architectural hardware

Guide to Sections:

Pages **Section A-**
Libra SMART
Electronic Knob Cylinder

Pages **Section B-**
Aries SMART
Electronic Trim Set

Pages **Section C-**
SMART **Locker**
Cabinet and Locker Security

Pages **Section D-**
Thesis 2.0
High Security Solenoid Bolt

Pages **Section E-**
Stylos SMART
Credential Reader

Pages **Section F-**
SMART **Relay**
Gates Barriers and Lock Opening

Pages **Section G-**
Serie 5
Electronic Rim Lock

Pages **Section H-**
Multiblindo EASY &
Motion EXIT
Electronic Multipoint Lock

Pages **Section I-**
X1R SMART & **X1R** EASY
Electromechanical Lock for
Armoured Doors

Libra SMART

Electronic Knob Cylinder

ISEO Zero1

Contents

A-02 - Half cylinder with electronic knob outside

A-03 - Electronic knob outside and mechanical “Standard” knob inside

A-05 - Electronic knob outside and mechanical “Premium” knob inside

A-07 - Electronic knob outside and electronic knob inside

A-09 - Electronic cylinder outside with extension plug for security escutcheon

A-09 - Libra Scandinavian Oval External Half Cylinder

A-10 - Accessories

A-11 - Key Cards/Fobs and Apps

A-12 - High Security Escutcheon

A-13 - Demonstration Case

A-14 - Display Units

Half cylinder with electronic knob outside

SMART LOCKER

ISEO Zero1

C-01

Smart **L**ocker

Smart Locker can be installed on a wide range of cabinets and lockers in order to protect users's belongings while they are in office, gym, swimming pool or in every similar situation where people need to deposit personal items in a secure place.

MAIN FEATURES

AUTO LOCKS JUST CLOSING THE DOOR

Closing the door of the cabinet the smart locker will auto latch.
Using a valid credential the door will unlock allowing access to the locker.

EASY TO INSTALL

the installation of the reader is easy and fast as it need only 2 screws and a hole for cables passage.

BATTERY OPERATION

The Smart Lockes is battery powered allowing easy installation in new lockers or retrofit in existing lockers currently operated by keys.

Multistandard RFID reader

The reader operates at 13,56 Mhz ISO 14443 A/B and it is compatible with card or tag Mifare Classic, Mifare Plus and Mifare DesFire.

BATTERY ENERGY SAVING

The readers wakeup patented system of the Smart locker with a credential allows an energy efficient battery management.

BATTERIES

Smart Locker is powered by 2 lithium batteries model ER14505M (3.6V AA). The batteries are in the internal side of the door in order to avoid any manipulation or vandalism.

CODE

SMART LOCKER WITH PIN LATCH, ARGO SOFTWARE.

Multistandard RFID Reader (ISO14443A/ISO14443B 13,56MHz).

Lock with pin latch.

Battery holder inside the door.

Package:

1 RFID reader, 2 batteries, fixing screws, instruction manual.

IS1EL00125I

DEMO KIT ON WOODEN STAND

SMART LOCKER WITH PIN LATCH, ARGO SOFTWARE

Multistandard RFID Reader (ISO14443A/ISO14443B 13,56MHz).

Lock with pin latch.

Battery holder inside the door.

Demo cards set.

Package:

1 demo display, 1 demo cards kit.

ISFXK0010

BATTERY

High current lythium battery

Thesis 2.0

Contents

- D-03 - Thesis 2.0
- D-04 - Thesis 2.0 Range
- D-05 - Double Door Situation
- D-06 - Single Door Situation
- D-07 - Thesis 2.0 Standard
- D-14 - Thesis 2.0 Standard Latchbolt
- D-19 - Thesis 2.0 Professional
- D-26 - Thesis 2.0 Professional Mini
- D-31 - Thesis 2.0 accessories

Thesis 2.0

Thesis 2.0 is a range of electro-mechanical locks which transforms a simple door in a smart access and makes it even safer and more functional thanks to its performances.

Unlike the traditional electric locks, its security status is automatically restored with a locking time which can be set according to any needs.

The Thesis 2.0 models ensure a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes.

The range of Stylos credential readers and controllers dialogue with Thesis 2.0 Standard in a direct way through Lockbus interface, i.e. without intermediate electronic devices.

Key Points

- The technology and materials chosen for THESIS 2.0 Standard guarantee its durability, which is much longer than the standard requirements.
- Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions, even with 8 Volts only.
- Power supply from 8 to 30Vdc 1A. Its operation is guaranteed also in complex installations and critical situations.
- Flexible installation conditions and low power consumption.
- Thesis 2.0 guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.
- The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.
- It can operate in interlock mode (manual or automatic) for bidirectional doors without any external control device.

Thesis 2.0 Standard

A steel deadbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0 Standard Latchbolt

It has the same features of the Standard version. Thanks to its self-locking and self-ejecting latchbolt, it works also as a traditional mechanical security lock.

It guarantees door locking, even if in case of lack of power supply, always in maximum security and comfort.

A steel autolocking self-ejecting latchbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).

The latchbolt ensures a typical mechanic lockcase functioning also in absence of the power supply. The door closing is always effective thanks to the latchbolt function.

Available only in Fail Secure mode (N.C. Normally Closed) version.

Thesis 2.0 Professional

It is the Heavy Duty version of the Thesis 2.0 Standard. It combines the functions of the standard version to the soundness and anti-manipulation resistance, which make it the ideal solution for professional installations where maximum passive security and high use frequency are required, such as shops, banks and public offices entrances.

The technology and materials chosen for THESIS 2.0 Professional guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).

A hardened steel deadbolt with a 18 mm diameter, and 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).

The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment.

This is why it is at the top of the market.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0 Professional Mini

It has the same features as the Professional version but its case is smaller and it can't be operated through handle and cylinder.

It is the ideal solution for installations where only the electric operation of the lock is required, eventually combined with other classic closing systems.

Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.

Thesis 2.0

ON INTERLOCKED DOORS

Thesis 2.0 Standard

Thesis 2.0 Standard transforms a simple door in a smart access and makes it even safer and more functional thanks to its performances. Unlike the traditional electric locks, its security status is automatically restored with a locking time which can be set according to any needs.

A steel deadbolt with a 20 mm extension ensures a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes.

The range of Stylos credential readers and controllers dialogues with Thesis 2.0 Standard in a direct way through Lockbus interface, i.e. without intermediate electronic devices.

Key Points

- The technology and materials chosen for THESIS 2.0 Standard guarantee its durability, which is much longer than the standard requirements.
- Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8 Volts only.
- A steel deadbolt with a 20 mm extension ensures a high anti-intrusion security (level 3 according to EN12209 standard).
- Power supply from 8 to 30Vdc 1A. Its operation is guaranteed also in complex installations and critical situations.
- Flexible installation conditions and low power consumption.
- Thesis 2.0 Standard guarantees a trouble-free operation even if installed horizontally.
- It represents the ideal solution for automatic sliding doors.
- The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.
- Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.
- It can operate in interlock mode (manual or automatic) for bidirectional doors without any external control device.

It is certified

Thesis 2.0 Standard is conceived and manufactured in compliance with European standards EN 14846:08, with the following classification:

(*) 0 = in combination with STATUS INDICATOR
1 = in combination without STATUS INDICATOR

Technical features

Backset: 25/30/35 mm

Deadbolt:

- hardened inox steel;
- cutting resistant (free rotating);
- Ø14mm diameter;
- single throw;
- 20mm extension.
- to prolong the life of the solenoid bolt the shape of the bolt guide has been improved by strengthening the collar.

European profile cylinder hole.

Handle follower (optional): 8mm;

Centre distance between handle follower and cylinder: 85mm

Front plate:

- inox steel;
- 25x371 mm – thickness 3mm;
- door positioning sensor and alignment device.

Striking plate:

- Inox steel;
- 25x367mm – thickness 3mm;
- 2 oval fixing holes for 4 mm vertical regulation and a central hole for definitive fixing;
- adjustable depending on the distance between the lock and the striking plate;

Case dimensions:

- thickness 22mm
- length 280mm
- depth 38/43/48 mm

DC supply voltage range: 8÷30Vdc.

Max. absorbed current power in operation: 1A.

CC power supply min. characteristics: 8÷30Vdc15W.

Opening control:

- opto-isolated input 8÷24Vdc/12Vac;
- Max voltage and current applicable to signalling relay:
- 24Vdc 1A;
- 120Vac 0.5A.

Programmable status signal:

- secured door status;
- door status;
- bolt status;
- command for motorised door opener.

Lockbus connection:

- data communication and power supply on the same 3 wire connections;
- maximum length 100 mt;
- secure devices authentication;
- encrypted data transmission for high security against hacking.

Thesis 2.0 Standard

Adjustable timings:

- door opening time (courtesy time): 1÷180 sec. (15 sec. default);
- delayed closure time (at closing of the door): 1÷60 sec. (1 sec. default).

Environmental features:

- operating temperature: -20°C÷+60°C;
- storage temperature: -25°C÷+70°C;
- protection level (IP grading): IP44;

Reference Standard: EN 14846:2008;

grading: 3 C 8 0 0 G 3 0 1

3 C 8 0 0 G 3 1 1 (in combination with STATUS INDICATOR).

Options and Versions:

With and without handle follower

Operating modes in case of power failure:

- Fail Secure mode (N.C. Normally Closed)
- Fail Safe mode (N.O. Normally Open)

The new implementation will allow the mechanical key override retraction to be fully mechanical and not reliant on a power source to assist with the bolt withdrawal.

Operating software:

- single door;
 - bidirectional doors with manual interlock functionality (*);
 - bidirectional doors with automatic interlock functionality (*);
- (*) direct connection between the 2 locks with encrypted communication.

Lockbus

LOCAL BUS

All devices belonging of the THESIS range are compatible with ISEO Lockbus.

Lockbus is a powerful multipoint bus sharing data transmission and power supply on the same 3-wire connection for utmost flexibility, easy installation and consequently, cost optimisation.

Lockbus highlights:

Data transmission and power supply on the same 3-wire connection up to 100mt;

Self-adjusting power supply from 8Vdc to 30Vdc;

Secure device authentication (among readers and actuators) and encrypted data transmission for high security against manipulation.

Thesis 2.0 Standard

DROPBOLT FAIL SECURE WITH HANDLE FOLLOWER.

Hardened steel bolt, Ø14mm diameter, one throw, 20mm excursion.

Stainless steel front plate with alignment device.

Stainless steel striking plate with alignment device and in line frame sensor.

Handle follower 8mm.

European profile cylinder hole.

Fail Secure mode.

Package: 1 dropbolt, 1 striking plate, instruction manual, screws, connector with rubber protection, handle follower.

Handle follower/cylinder centre distance 85mm

Thesis 2.0 Standard Latchbolt

DROPBOLT FAIL SECURE WITHOUT HANDLE FOLLOWER.

Hardened steel latchbolt, Ø14mm diameter, self-ejecting function, 20mm excursion.

Stainless steel front plate with alignment device.

Stainless steel striking plate with alignment device and in line frame sensor.

Without handle follower.

European profile cylinder hole.

Fail Secure mode.

Package: 1 dropbolt, 1 striking plate, instruction manual, screws, connector with rubber protection.

Thesis 2.0 Standard Latch - Fail Secure - Without 8mm Handle

Thesis 2.0 Professional

Thesis 2.0 Professional is the Heavy Duty version of the Thesis 2.0 Standard. It combines the functions of the standard version to the soundness and anti-manipulation resistance, which make it the ideal solution for professional installations where maximum passive security and high use frequency are required, such as shops, banks and public offices entrances. Thesis 2.0 transforms a simple door in a smart gate and makes it even safer and more functional because it restores automatically its security status thanks to the delayed time locking to be set directly from the end user according to his different needs. A steel deadbolt with a 22 mm extension ensures a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes. The range of Stylos credential readers and controllers dialogue with Thesis 2.0 Professional in a direct way through Lockbus interface, i.e. without intermediate electronic devices, creating flexible and effective electronic access control solutions.

Key Points

- The technology and materials chosen for THESIS 2.0 Professional guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).
- A hardened steel deadbolt with a 18 mm diameter, and 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).
- The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment. This is why it is at the top of the market.
- Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8V only!
- Power supply from 8 to 30Vdc 1A. Its operation is guaranteed also in complex installations and critical situations. Flexible installation conditions and low power consumption.
- Thesis 2.0 Professional guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.
- The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.
- Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.
- It can operate in interlock mode (manual or automatic) for double doors without any external control device.

It is certified

Thesis 2.0 Professional is conceived and produced and manufactured in compliance with European standards EN 14846:08, with the following classification:

3 H 8 0 0 M 7 0/1 1 *

- (*) 0 = in combination with STATUS INDICATOR
1 = in combination without STATUS INDICATOR

Technical features

Backset: 30/35/40 mm

Deadbolt:

- hardened steel;
- diameter Ø18mm;
- single throw
- extension 22mm.

European profile cylinder hole

Handle follower (optional): 8mm;

Centre distance between handle follower and cylinder: 85mm

Front plate:

- inox steel;
- 30x371 mm – thickness 4mm;
- door positioning sensor and alignment device;

Striking plate:

- Inox steel;
- 30x371 mm – thickness 4mm;
- adjustable depending on the distance between the lock and the striking plate;

Case dimensions:

- thickness 27mm
- length 280mm
- depth 44/49/54 mm

DC supply voltage range: 8÷30Vdc.

Max. absorbed current power in operation: 1A.

CC power supply min. characteristics: 8÷30 VDC15W.

Opening control:

- opto-isolated input 8÷24Vdc/12Vac;

Max voltage and current applicable to signalling relay:

- 24Vdc 1A;
- 120Vac 0.5A;

Programmable status signal:

- secured door status;
- door status;
- latchbolt status;
- command for motorised door opener;

Lockbus connection:

- data communication and power supply on the same 3 wire connections;
- maximum length 100 mt;
- secure devices authentication;
- encrypted data transmission for high security against hacking;

Adjustable timings:

- door opening time (courtesy time): 1÷180 sec. (15 sec. default);
- delayed closure time (at closing of the door): 1÷60 sec. (1 sec. default).

Thesis 2.0 Professional

Environmental features:

- operating temperature: -20°C÷+60°C;
- storage temperature: -25°C÷+70°C;
- protection level (IP grading): IP44;

Reference Standard: EN 14846:2008;

grading: 3 H 8 0 0 E 7 0 1

3 H 8 0 0 E 7 1 1 (in combination with status indicator)

Options and Versions:

With and without handle follower

Operating modes in case of power failure:

- Fail Secure mode (N.C. Normally Closed)
- Fail Safe mode (N.O. Normally Open)

Operating software:

- single door;
 - bidirectional doors with manual interlock functionality (*);
 - bidirectional doors with automatic interlock functionality (*);
- (*) direct connection between the 2 lock with encrypted communication.

Lockbus

LOCAL BUS

All devices belonging of the THESIS range are compatible with ISEO Lockbus.

Lockbus is a powerful multipoint bus sharing data transmission and power supply on the same 3-wire connection for utmost flexibility, easy installation and consequently, cost optimisation.

Lockbus highlights:

Data transmission and power supply on the same 3-wire connection up to 100mt;

Self-adjusting power supply from 8Vdc to 30Vdc;

Secure device authentication (among readers and actuators) and encrypted data transmission for high security against manipulation.

DROPBOLT FAIL SECURE WITH HANDLE FOLLOWER.

Hardened steel bolt, Ø18mm diameter, one throw, 22mm excursion.

Stainless steel front plate with alignment device.

Stainless steel striking plate with alignment device and in line frame sensor.

Handle follower 8mm.

European profile cylinder hole.

Fail Secure mode.

Package: 1 dropbolt, 1 striking plate, instruction manual, screws, connector with rubber protection, handle bracket.

Handle follower/cylinder centre distance 85mm

Thesis 2.0 Professional Mini

Thesis 2.0 Professional Mini has the same features as the Professional version but its case is smaller and it can't be operated through handle and cylinder. It is the ideal solution for installations where only the electric operation of the lock is required, eventually combined with other classic closing systems. A steel deadbolt with a 22 mm extension ensures a high anti-intrusion security, and the opening operation can be controlled by transponders, contactless cards and/or PIN codes. The range of Stylos credential readers and controllers dialogue with Thesis 2.0 Professional Mini in a direct way through Lockbus interface, i.e. without intermediate electronic devices, creating flexible and effective electronic access control solutions.

Key Points

- The technology and materials chosen for THESIS 2.0 Professional Mini guarantee its durability, which is much longer than the standard requirements (even over 1 million operating cycles).
- A hardened steel deadbolt with a 18 mm diameter, a 22 mm extension and a 4 mm stainless steel front plate ensure a high anti-intrusion security (level 7 according to EN12209 standard).
- The operation is guaranteed even in case of a residual lateral load up to 15N and of a bad door alignment. This is why it is at the top of the market.
- Innovative electronics with power reserve (booster) guaranteeing an efficient deadbolt movement in difficult operating conditions: even with 8V only!
- Power supply from 8 to 30 VDC 1A. Its operation is guaranteed also in complex installations and critical situations. Flexible installation conditions and low power consumption.
- Thesis 2.0 Professional Mini guarantees a trouble-free operation even if installed horizontally. It represents the ideal solution for automatic sliding doors.
- The Lockbus interface allows the direct connection with Iseo Stylos Line credential readers, for a simple but effective access control management.
- Available both Fail Secure mode (N.C. Normally Closed) and Fail Safe mode (N.O. Normally Open) versions.
- It can operate in interlock mode (manual or automatic) for double doors without any external control device.

It is certified

Thesis 2.0 Professional Mini is conceived and manufactured in compliance with Europe an standards EN 14846:08, with the following classification:

3 H 8 0 0 M 7 0/1 1 *

(*) 0 = in combination with STATUS INDICATOR

Stylos Smart Credential Reader

ISEO Zero1

ISEO Zero1

Stylos Smart Credential Reader

Contents

E-02 - Stylos Smart

E-04 - Stylos Wall Reader

E-06 - Key Cards/Fobs and Apps

Stylos Smart

The Credential reader Stylos Smart of ISEO Zero1 product range can be easily rekeyed with a Bluetooth Smart Ready phone: cards, tags or phones can be intuitively added or deleted using Argo, the ISEO smartphone application running on iOS or Android.

Key points:

Stylos Smart is a Multistandard ISO 14443 A/B Credential reader.

The readers can be provided in two versions:

- for indoors
- for outdoors (IP66).

ISEO locks with Lockbus interface, such as the Thesis 2.0 dropbolt, can be directly connected to credential readers without external actuators. They can also manage double accesses with interlock functions and signal lights.

The electronic actuator allows a direct control of electromechanical locks and electric strikers or, by using the built-in relay, of any other access control device such as car park bars, sliding doors, electric locks and so on. The Stylos Smart Line is provided with a self-adjusting power supply from 8Vdc to 30Vdc ensuring top flexibility and allowing in most cases the use of an existing supply even when the theoretical parameters are deteriorated.

Stylos Smart has connectivity to Bluetooth Smart Ready devices without any plugin to be installed neither on the reader nor on the smartphone.

It can be opened by RFID cards and Bluetooth Smart Ready phones (iOS and Android).

Lost or stolen keys can be quickly deleted with Argo, an intuitive smartphone application available for:

- iOS from iPhone 4S with iOS 7
- Android from version 4.3 (Jelly Bean) featuring Bluetooth Smart Ready hardware

Main functions:

- Operates with Iseo cards or Legacy Mifare cards
- Memorizes up to 300 users (cards or phones).
- Stores the last 1000 events.
- Connects via Bluetooth Smart to a Bluetooth Smart Ready phone.
- Remote opening and communication with Bluetooth Smart Ready phone up to 10 meters.
- Software upgradable on site via Bluetooth Smart Ready phone.
- Multistandard contactless RFID readers ISO14443/A and ISO14443/B - 13,56 Mhz.
- Wall mounting reader.
- Power supply from 8 to 30Vdc.
- 3-colour Led or display.
- External IP66 version.
- Lockbus interface multipoint bus sharing data transmission and power supply on the same.
- 3-wire connection for utmost flexibility, easy installation and consequently, cost optimisation.

Stylos Smart

Key points:

Multistandard RFID reader 13,56 Mhz ISO 14443 A/B (compatible with Mifare Classic, Mifare Plus and Mifare DesFire)

Interfaces:

- Bluetooth Smart
- RFID and Near Field Magnetic Communication
- Lockbus

Real Time Clock/Calendar.

Power supply:

- 8Vdc to 30Vdc

Software (Firmware):

- on-site upgrading

Signals:

- Led Version
- . 3-colour series green, red, blue
- . Acoustic buzzer
- Display and keypad version
- . graphic display O-led 128x64 dots
- . Acoustic buzzer

Keyboard: 12 buttons with backlight controlled from firmware.

Mounting:

- Wall mounting
- Spacer available

Environmental features:

- Operating temperature: $-20^{\circ}\text{C} \div +60^{\circ}\text{C}$
- Storage temperature: $-25^{\circ}\text{C} \div +75^{\circ}\text{C}$.
- IP Protection grade: IP66 (version for outdoors)

Dimensions (HxLxD): 130 x 47,5 x 17,5 mm

GENERIC ACTUATOR technical features:

Power supply: 8Vdc to 30Vdc.

Firmware: - on-site upgrading.

Inputs: 3 Inputs (1 digital, 1 analogic and 1 digital or analogic).

Outputs: 1 relay (24V 1A) + 1 booster (for direct electric lock).

Operating temperature: $0^{\circ}\text{C} \div +50^{\circ}\text{C}$

Storage temperature: $-25^{\circ}\text{C} \div +75^{\circ}\text{C}$.

Box: for DIN35 rail.

Lockbus

Data transmission and power supply on the same 3-wire connection up to 100 m.

Self-adjusting power supply from 8Vdc to 30Vdc.

Secure device authentication (among readers and actuators) and encrypted data transmission for high security against manipulation.

CREDENTIAL READER WITH LED.
RFID contactless multistandard.
ISO14443/A - ISO14443/B.
Radio BT4.0 module.
Lockbus interface.
8-30Vdc Power Supply.
Wall mounting.
Package: 1 reader, instruction manual,
2 screws for metal, 2 screws for plastic, 2 fisher adaptors.

IS-5E1350156

CREDENTIAL READER WITH DISPLAY AND NUMERIC KEYPAD.
RFID contactless multistandard.
ISO14443/A - ISO14443/B.
Radio BT4.0 module.
Lockbus interface.
8-30Vdc Power Supply.
Wall mounting.
Package: 1 reader, instruction manual,
2 screws for metal, 2 screws for plastic, 2 fisher adaptors.

IS-5E1350456

ALL-WEATHER CREDENTIAL READER MODULE.
RFID contactless Multistandard ISO14443/A - ISO14443B.
Multicolor signaling LEDs.
To be used with 5E0550010.
IP66 protection grade.
Control unit connection cable included (L=5 Mt)
Wall mounting.
Package: 1 reader module with connecting cable, installation
sheet,
2 metal screws, 2 plastic screws, 2 fisher adaptors.
Note: control unit non included, to be ordered separately.

IS-5E1312106

CONTROL UNIT FOR ALL-WEATHER READER MODULE.
Compatible with all-weather credential reader modules.
Radio BT4.0 module.
Lockbus interface.
8-30Vdc Power Supply.
DIN35 rail housing.
Packaging: 1 control unit with connectors, 1 DIN35 rail fixing kit,
installation manual.
Note: reader module non included, to be ordered separately.

IS-5E0550010

ELECTRIC LOCK ACTUATOR.
 1 relay + 1 booster.
 3 inputs (1 digital, 1 analog, 1 digital/analog)
 Lockbus interface
 8-30Vdc Power Supply
 DIN35 rail mounting.
 Package: 1 actuator, instruction manual.

IS5E2501
 Stylos Smart Lock
 Actuator

SMART RELAY

ISEO Zero1

F-01

Stylos Smart Relay

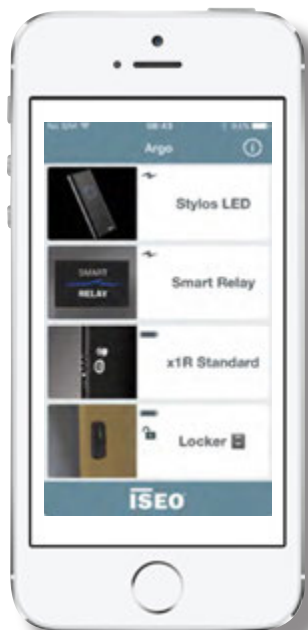

Smart Relay is one of the products of the ISEO Zero1 product range that can be controlled using Argo, a smartphone app available for both iOS and Android that allows for door access permissions to be added, deleted and modified.

Smart Relay allows you to open electric locks, motorised gates and any electrical actuator which can be activated at the simple touch of a button.

Main functions:

- Remote opening via Bluetooth Smart Phones up to 10 meters
- Up to 300 users (phones and invitations)
- Stores the last 1000 events
- Hidden Relay box
- AES 128 encryption
- **ARGO** invitations -
Send electronic keys at the door
- **ARGO** Guest key -
Send a virtual key anytime to anywhere

Serie 5

ELECTRIC RIM LOCK

The contemporary new **DESIGN** is only one of the significant new features of the **SERIE 5**.

ADJUSTABLE BACKSET SIZE: settable to 50, 60, 70 or 80 mm.

REVERSIBLE: the lock can be inverted with a few simple settings.

MULTIFUNCTIONAL: a choice of three internal control configurations is available in a single lock: cylinder only, cylinder and button or button only.

UNIVERSAL: an additional code of the latch only lock (with one product code only) comes complete with special accessories for installation on either steel gates or wooden main entrance doors.

SERIE 5 increases performance while reducing the number of different product codes necessary: **148 conventional lock product codes have been replaced by just 12 codes**, cutting warehousing costs drastically throughout the entire distribution network.

- Less product codes to handle for the wholesaler, improving the quality of the service offered to clients.
- Less shelf space usage for the retailer while still stocking solutions catering for the same number of applications as before.
- Locksmiths and installers no longer need to know the type of lock to be replaced on site.
- Locksmiths can always find the lock that they need when they need it.

- DESIGN
- ADJUSTABLE
- REVERSIBLE
- MULTIFUNCTIONAL
- UNIVERSAL

- Easily interchangeable with all main products on market today. EASY REPLACEMENT.
- Power supply: 12 V AC – 15 W 1.25 A;
- Available in **ISEO** marbled grey paint and chrome finish.
- 3 keys included.
- All settings made directly on lock, even just before definitive fastening.

Multiblindo 92 mm centre distance

ELECTROMECHANICAL 12Vdc MULTIPPOINT mortice lock for metal frames, AUTOMATIC LOCKING OF THE LATCHBOLT AND 3 DEADBOLTS, **ROTATING HOOK DEVIATORS**.

Central lock, centre distance 92mm, operating with European profile cylinder.

Right or left latchbolt, **non reversible**.

Deadbolts and latchbolt operated by key, handle or motor.

Lock and deviators deadbolts 27mm throw, with anti-drill and anti-cut cover plates in carbonitrided steel. Connection cable, 2 nylon end blocks for U-version. Fixing screws. Instruction sheet.

Accessories to be ordered separately:

Striking plates U-front plate

Multiblindo motion EXIT 92 mm centre distance

Multiblindo eMotion EXIT with panic function is operated by an horizontal bar and is made up of the **ELECTROMECHANICAL 12Vdc** MULTIPOINT mortice lock for metal frames in combination with its striking plates, and operating bar Pro EXIT.

AUTOMATIC LOCKING OF THE LATCHBOLT AND 3 DEADBOLTS, ROTATING HOOK DEVIATORS.

With microswitch detects and signals the deadbolt status. Central lock, centre distance 92mm, operating with European profile cylinder. Right or left latchbolt, **non reversible**. Deadbolts and latchbolt operated by key, handle or motor.

Lock and deviators deadbolts 27mm throw, with anti-drill and anti-cut cover plates in carbonitrided steel.

Connection cable, 2 nylon end blocks for U-version. Fixing screws. Instruction sheet.

x1R Smart

x1R SMART is a motorised electronic lock specifically designed for security doors. It combines the solidity of a mechanical lock with the versatility of electronic control via smartphone, RFID tag or keypad.

Opening occurs with the aid of a motor or the “Single Action” quick release and closing occurs through motorised action controlled by a next-generation microprocessor. In case of lack of power supply the operation of the deadbolt is guaranteed by the traditional movement of keys, equipped with a security system that is able to disconnect motorisation during operation of the mechanical cylinder.

Locks of the x1R Smart series are interchangeable with the most common mechanical locks as they use the same mechanical accessories. The electronic accessories’ “plug and play” electrical connections make installation extremely easy.

The system is managed through Iseo Argo, an app available on iOS and Android which you can use to connect your smartphone via Bluetooth 4.0 LE and manage all functions.

It can be interfaced with the Iseo access control platform or a third-party system through opto-isolated Input/Output connections which can be used to control the operation modes and states for opening and closing. By using the lockbus connection with proprietary protocol it is possible to have a direct and secure connection with the Iseo range devices.

All models are available with different projections and bolt centre-to-centre distances for a vast interchangeability with mechanical versions. Escutcheons are available in various finishes.

Thanks to the solidity of the mechanical structure it is classified at the maximum grade (7) for anti-intrusion protection (EN12209).

It is certified

x1R Smart has been designed and manufactured in compliance with European standards EN14846:2008 with the following classification:

MAIN FUNCTIONS

- Smart device with Bluetooth 4.0 LE radio interface.
- Opening and programming via Argo App on iOS and Android devices.
- Motorised opening and closing of deadbolts and latchbolt
- Quick opening from inside the room with “Single Action” handle (optional)
- Opening via PIN code, RFID Credentials 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
- Opening via European profile cylinder (EN1303, DIN 18252)
- Battery powered low-energy consumption device (optional)
- Wake up upon RFID card detection (patented)
- Battery charge status detection
- Light and sound signals
- Hold open function (office function) without extra energy consumption
- 5 different operation modes can be set by the user
- Real Time Clock/Calendar
- Memory storage of 300 users
- Memory of the last 1000 events
- Software that can be updated by the user in the field
- Compatible with the main mechanical locks for security doors

TECHNICAL FEATURES

Backset: 63 mm

Deadbolt projection: 3 mm to 13 mm

Deadbolts:

- In chrome-plated steel
- Cylindrical section \varnothing 18 mm
- Versions with 3 pistons (37 mm) and 4 pistons (28 mm)
- 2 throws
- Total excursion 30 mm

Latchbolt:

- In chrome plated steel
- Reversible hand
- Cylindrical section \varnothing 20 mm
- Adjustable projection (+6 mm)

Door contacts:

- Two front contacts in chrome-plated brass
- Rectangular section 10x8
- Reversible hand
- Adjustable projection from 0 to 15 mm
- Nylon stop with chrome plated brass contacts
- Connection for power supply from 8 to 30 VDC 30W

Mechanical controls:

- Set up for European profile cylinder (EN1303, DIN 18252)
- Cylinder fixing system through support side screw
- Handle follower: section 8 mm
- Centre distance between handle follower and cylinder hole 85 mm

Lock fixings:

- Mortice lock with front plate in chrome-plated steel (dimensions H 410 mm x L 35 mm x W 3 mm)
- Rim lock with 4 fixing screws M6
- Rim lock with 4 fixing screw nuts M6

Lockcase dimensions:

- Width 30 mm
- Height 262 mm
- Depth 136 mm

Top and bottom rod attachments:

- In zinc-plated steel
- Maximum projection 53 mm (upper), 50 mm (lower)
- Rods projection 20 mm

Power supply:

- Battery operated with 6 1.5 VDC alkaline batteries (duration around 30,000 opening cycles)
- Power supply from 8 to 30 VDC 30W
- Consumption at rest 0.05A – Maximum (forced) 2.5A

Connections:

- Bluetooth LE 4.0 radio module (integrated into external control modules)
- External control module with RFID reader 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
- External control module with backlit keypad and RFID reader 13.56 Mhz (ISO 14443A-ISO 14443B), Classic Mifare, Plus, Desfire
- Two button internal control module (encrypted communication)
- Opto-isolated opening control 8-30 VDC/VAC
- Power from 8 to 30 VDC 30W

Relay status signal configurable from the App:

- Door secured (in frame door + deadbolts and latchbolt out)
- Opening control for motorised door operator

Software:

- Argo app for smartphone
- Free and available for iOS and Android devices
- OEM development platform available via SDK

Programming:

- Master Card set for programming
- With Argo App (User Management, Door parameters, Events logs, Utility)
- Lock firmware and peripheral devices can be updated on-site

Opening credentials:

- Card, key fob and Iseo transponder keyring
- Card 13.56 Mhz (ISO 14443A-ISO 14443B) Classic Mifare, Plus, Desfire
- Pin code (from 4 to 14 digits)
- Programming of a maximum of 300 credentials

Environmental characteristics:

- Operating temperature -20°C +70°C
- Storage temperature -25°C +75°C
- IP lock protection grade: IP44

Reference standards UNI EN 14846:2008

- Classification 3M800M711

Options and versions:

- Standard or with "Single Action" quick opening device
- Rim or mortice version
- 3 pistons (37 mm) and 4 pistons (28 mm)
- Bolt projection 3 mm or 13 mm
- Battery operated (with mains electricity power supply optional)
- Mains electricity (with optional back-up batteries)
- Connection through 8-pole multifunction cables
- Remote control connection through bipolar cable and adjustable door contact.

 Handle follower 8 mm for latchbolt operation.
 Top and bottom attachments for rods for additional closures.
 Rim fixing with 4 passing screws or screw nuts.
 Set up for M6 passing screws for cylinder protection fixing.
 Reversible door sensor with adjustable projection, including alignment device.
 Supplied with: lock, door sensor, cylinder fixing screws, assembly instructions.

IS98024624	latch projection 24 mm - POLISHED BRASS VARNISHED
IS98034624	latch projection 24 mm - SATIN CHROME
IS98044624	latch projection 24 mm - POLISHED CHROME

x1R, available in mortice and rim versions, is an electronic motorized lock specifically developed to be installed on armoured doors.

Key points

It works with an electric motor controlled by a powerful microprocessor and the deadbolt action is always guaranteed by the mechanical operation of the key, even in case of power supply failure.

x1R locks have the same sizes and accessories as the mechanical locks, so they are interchangeable; thanks to simple electric connections the installation is very easy.

All versions are reversible, have different deadbolt extensions and centre distances

Escutcheons are available in three different finishes.

Thanks to its structure it is classified at the maximum level (7) for the anti-intrusion protection (EN12209)

It is certified

x1R is conceived and manufactured in compliance with European standards EN14846 with the following classification:

Technical features

Central lock with top and bottom rods connecto

Versions with 3 or 4 deadbolts diameter 18 mm

European profile cylinder hole.

Handle follower 8 mm.

Backset 63 mm

Centre distance 85 mm

Power supply:

- battery (6 batteries 1,5 Vdc)

- power supply unit from 9 to 14 Vd

5 function modes to be set by the end user

RFID cards/keys reader frequency 125 Khz.

Numerical keyboard (optional)

Opening by external control (remote control pushbutton, etc.)

Keys or master and user code programming

Keyboard for opening and programming (from inside).

In line frame sensor.

Operating temperature: -10°C ÷ +60°C

Electronic Solutions

Thanks to their high technology features, ISEO Zero1 products offer comfort and ease of use. They can all be integrated to manage any access in any situation, offering flexibility, smart solutions and security.

THE LATEST EVOLUTION OF ACCESS CONTROL

Argo App available for any smartphone (iOS and Android). Suitable for ISEO Zero1 devices thanks to Bluetooth Smart technology. No need of additional hardware plug-ins. Management of the opening authorizations. Handling of particular users' authorizations. Free software updates.
