TIMELESS ELEGANCE MEETS CONTEMPORARY DESIGN

Micucci Interiors offers an exclusive range of designer home accessories, lighting and fine art. Although the company specialises in accessories, Micucci sometimes incorporates very special and unique pieces into the collection, resulting in an eclectic mix rather than a uniform style. The Micucci designers travel around Europe and the rest of the world to source exciting new pieces that are often added to its collections. Micucci Interiors allows you to add interesting pieces to your interiors, teaming the elegant with the unusual. Design choices are dictated by spontaneous attraction to shapes and colours, as much as knowledge of design. The team draws its inspiration from famous designers and artists from around the world, which helps Micucci put together the ranges of carefully curated pieces. Explore the Micucci lighting collection, which is created by hand, a one-piece-at-a-time process that involves careful and attentive dedication to delivering a high-quality product. Choose from table lamps to pendant lights, and from floor lamps to wall lights, which are all suitable for both commercial and residential projects. Most of the pieces are currently in stock and available for immediate dispatch. Bespoke designs and custom finishes are available on request.

SEVILLE RANGE BY HERITAGE BRASS

Heritage Brass, the well-established brand of M Marcus Ltd., a major UK manufacturer of solid brass architectural hardware and wiring accessories has launched its Seville Range. This year has seen the introduction of several combination ranges from M Marcus. The latest offering, the Seville Range, pairs Polished Brass inserts with a luxuriously silky Gloss White finish. Created by applying high quality paint to solid brass plates and sealing with a high gloss lacquer, the Seville Range offers a charming combination of finishes echoing the timeless elegance of marble and gold. If a more contemporary look is desired, the Seville Range is also available with Polished Chrome inserts. Combination

ranges such as this and the Verona Range, which features Matt Bronze plates with Antique Brass inserts, have proved to be an increasingly popular choice in residential and high end hospitality design. The twist of combining a plate with a contrasting or complementing insert creates an eye catching and unique product which enables design continuity by highlighting multiple finishes within the interior. When installed, it is evident that the smallest details in the décor scheme have been considered. Heritage Brass's electrical range boast 16 unique finishes and an extensive array of plate styles. **+44 (0)1384 247 845** electsales@m-marcus.com | www.m-marcus.com
