Box Depth

When installing electrical accessories it is important to ensure that wall boxes of adequate depth are used. The box depth should comfortably accommodate the accessory and its connecting cables, and is particularly important with flat plate ranges and power accessories. This catalogue gives recommended box depths for normal installation conditions.

Finishes

Heritage Brass offers its electrical accessories in a variety of quality finishes. The illustrations shown in this catalogue provide a good representation of these finishes subject to the constraints of the colour printing process. Viewing the actual finishes in differing types of light may however cause subtle perceived differences in colour tone.

Antique/Rustic/Aged Finishes

Whilst much care is taken in maintaining the consistency of our vintage finishes, colour tones and surface patterning may vary slightly due to the individual plate finishing processes involved.

British Standards

The Heritage Brass Electrical Collection is designed and manufactured to comply with the requirements of the relevant British Standards.
